Environmental Vision 2021

Environmental Vision 2021 is the long-term environmental management vision of the Mitsubishi Electric Group. With the guideline of making positive contributions to the earth and its people through technology and action, the Company is working toward the realization of a sustainable society utilizing wide-ranging and sophisticated technologies as well as the promotion of proactive and ongoing actions by our employees. The Vision sets 2021 as its target year, coinciding with the 100th anniversary of Mitsubishi Electric's founding.

for a greener tomorrow

Eco Changes is the Mitsubishi Electric Group's environmental statement, and expresses the Group's stance on environmental management. Through a wide range of businesses, we are helping contribute to the realization of a sustainable society.

Certificate Number 79222 Certificate Number 78649

Mitsubishi Electric Consumer Products has acquired ISO 9001 certification under Series 9000 of the International Standard Organization (ISO). The plant has also acquired environmental management system standard ISO 14001 certification.

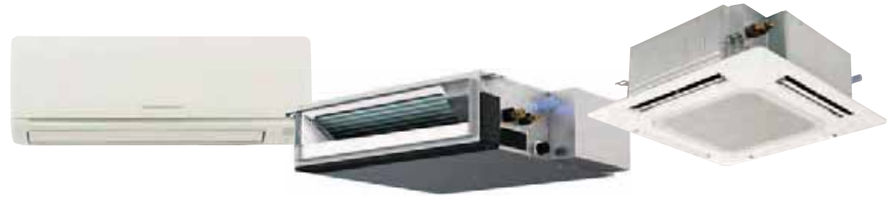
THE INNOVATION BEHIND TRUE PERFORMANCE



A COMFORT SOLUTION TO ALL YOUR NEEDS

No two environments are alike. Whether you spend time in a house, a condo, a cottage or even a small office, each design, each floor plan, each room offers its own challenge to something as important as proper heating, air conditioning and circulation. Mitsubishi Electric Mr. Slim systems are designed to adapt to these challenges. And even better, we offer more systems than ever that meet ENERGY STAR standards.

Reliable, easy to install, and extremely quiet, the revolutionary design and innovative technology of the Mr. Slim M-Series are perfect for any situation. Not to mention that our systems can provide excellent heating performance even when outdoor temperatures drop down to -25°C! As a premium heating and cooling system, Mr. Slim can operate ductless or be installed through modest concealed ductwork. Either way, you can be sure to expect quiet operation and years of satisfaction.

A PROUD CANADIAN HERITAGE

Mitsubishi Electric Canada was established in 1979 as a subsidiary of the Mitsubishi Electric Corporation of Japan. Since then, we have been at the forefront of providing Canadians with unparalleled quality of heating and air conditioning technology, sales, installation and support. Our high standard of quality saves you from rising energy costs and helps build a sustainable tomorrow.

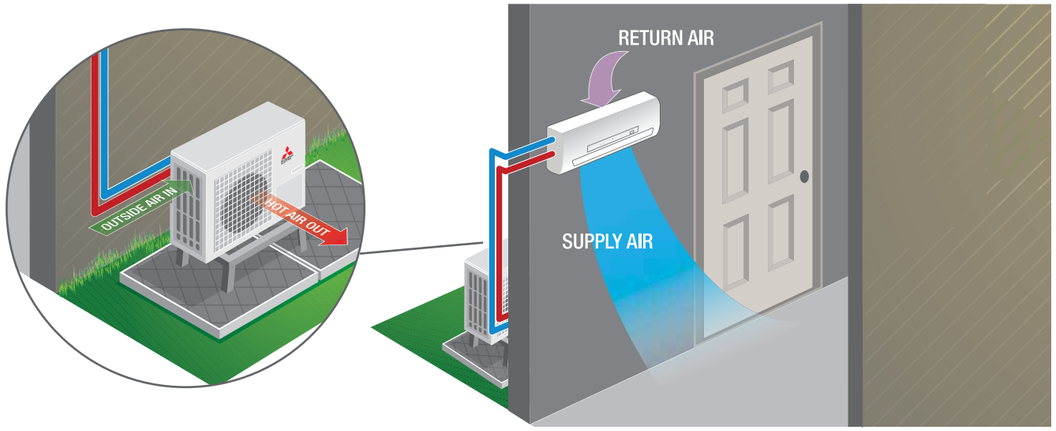
MITSUBISHI ELECTRIC
Changes for the Better

MitsubishiElectric.ca

THE TECHNOLOGY BEHIND AN INDUSTRY LEADER



WHAT IS A HEAT PUMP?

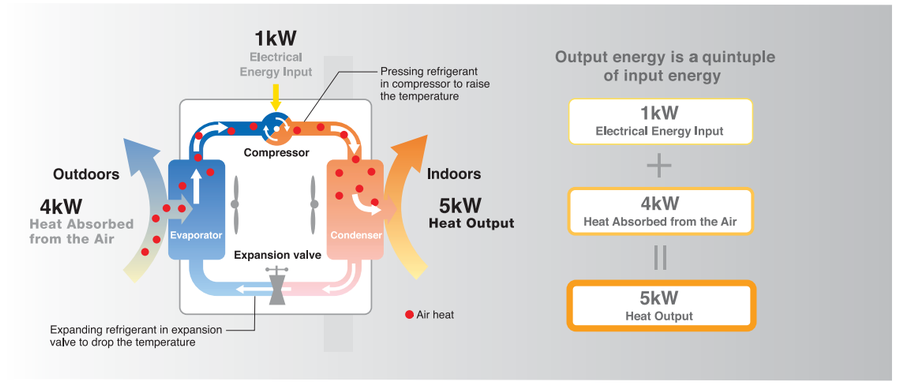
Well, first of all, a heat pump is capable of both heating and cooling your home. But as the name suggests, it pumps heat from one place to another. The bigger question is: where does this heat come from?

A heat pump works by using a refrigerant to transfer heat energy between indoors and outdoors. On warm days, heat is extracted from indoors and transferred outside. On cold days, the opposite happens and your home is warmed with the heat energy from outside. Even in the coldest Canadian climate there is still an amount of heat present. With Mitsubishi Electric's advanced technology, your Mr. Slim system can extract heat, even when temperatures fall **as low as -25ºC**.

That's why only a Mr. Slim heat pump is the true evolution in year-round comfort, even in some of Canada's toughest climates.

HEAT PUMP PRINCIPLE (WHEN HEATING)

Refrigerant and Heat Circulation

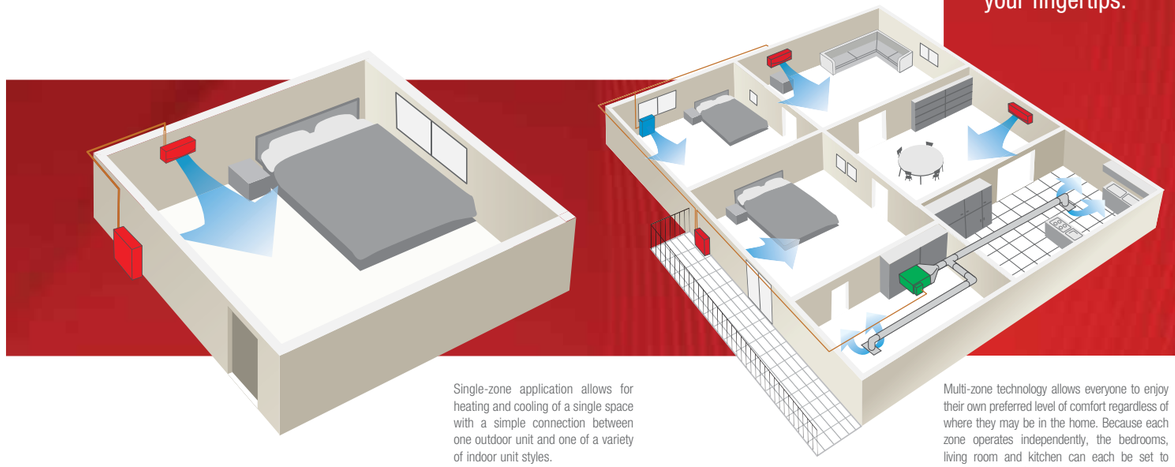


DUCTED OR DUCTLESS, IT'S A COMFORTABLE CHOICE

Mr. Slim is best known as the perfect solution for dwellings without existing ductwork. The powerful simplicity of an indoor and outdoor unit connected by two refrigerant lines, running through a small 10-cm opening in the wall or ceiling is both effective and cost efficient. Mitsubishi Electric also introduced the convenient option of using a ducted indoor unit as well. By using compact ductwork connected to a ceiling-concealed indoor unit, Mr. Slim can deliver its efficient temperature control in a truly discreet manner.

An innovative fan-blade design and grille shape in our outdoor unit makes the M-series system one of the quietest on the market. Our systems are available in sizes from 6,000 to 48,000 BTU/h, offering one of the widest selections in the industry. In fact, with our newest model, you can even install up to 8 indoor units to a single outdoor unit, keeping exterior installation space to a minimum.

Installation is easy: simply mount the indoor and outdoor units, connect the refrigerant lines, and make the needed electrical connections to power the system. Before you know it, you've got superior comfort technology at your fingertips.



Single-zone application allows for heating and cooling of a single space with a simple connection between one outdoor unit and one of a variety of indoor unit styles.

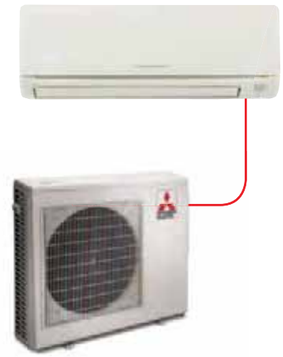
Multi-zone technology allows everyone to enjoy their own preferred level of comfort regardless of where they may be in the home. Because each zone operates independently, the bedrooms, living room and kitchen can each be set to different temperatures at the same time.

COMPLETE HOME COMFORT COMES IN MANY DEGREES

In conventional heating and cooling systems, it's one thermostat, one temperature for everyone. But in real life, one size does not fit all. With a Mr. Slim Multi-Split system, each room of your home can have its own indoor unit – up to 8 units in total and they can all be connected to a single outdoor condenser unit. That means everyone can enjoy optimum comfort, no matter what room they're in.

And you don't have to commit to installing a full system. As your needs change, additional indoor units are easy to add on to your existing multi-split Mr. Slim system.

If you're looking to heat or cool a single space like a room over a garage or a home extension, your best choice is a Mr. Slim Single-Split system. A Single-Split system connects a single dedicated outdoor unit to a single indoor unit. So no matter what your needs are, there's a Mr. Slim solution that's right for you.



Mr. SLIM™

MITSUBISHI ELECTRIC
Changes for the Better

LOW ENERGY USE IS HIGH SATISFACTION

VCSi TECHNOLOGY

AT THE HEART OF MR. SLIM LIES VARIABLE COMPRESSOR SPEED INVERTER (VCSi) TECHNOLOGY

Conventional compressors work through on/off cycles only, where the system starts with a surge and stays on at a fixed speed until no longer needed. This on/off cycle constantly uses maximum power *(full load)* and is an inefficient way to heat or cool your home.

VCSi systems, on the other hand, operate efficiently by continually detecting changes in room temperature and readjusting the compressor speed to provide high-speed heating or cooling when needed. By maintaining a consistent temperature using only the power required *(part load)*, your energy costs are reduced.

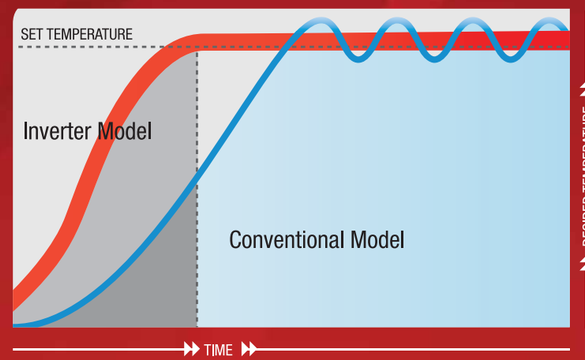
TWO WAYS VCSi TECHNOLOGY SAVES ENERGY

1. You probably know that it takes more energy to start a car or computer than it takes to run it. The same is true for conventional heating and cooling units. With Mr. Slim, however, the compressor starts at a minimum speed *(soft start)* and increases to match the required load. This prevents the compressor from drawing the extra amps needed during a start-up, as is the case with a conventional compressor that always runs at maximum speed.

2. Once the desired temperature of a room is reached, the compressor slows down to maintain a consistent temperature. By slightly adjusting speed instead of shutting off and turning on again, electrical loads are kept constant and minimal rather than peaking wastefully.

SEE HOW MR. SLIM COMPARES

VCSi systems	Conventional systems
VCSi compressor speeds up and slows down to maintain the conditioned space temperature.	Conventional compressor turns on and off to maintain the temperature. A compressor draws more amps at start-up than any other time.
Energy consumed by a **VCSi** compressor is directly related to the required amount of cooling or heating. (Capacity changes as needed.)	Conventional compressor consumes maximum amount of energy to produce maximum amount of cooling or heating at all times. (Capacity does not change.)
VCSi compressor helps system reach its set point quicker by running at a higher RPM for a shorter period of time, then ramps down to maintain temperature.	Conventional compressor runs at same RPM for longer period of time, then switches on and off to maintain temperature.
Indoor temperature swing is minimized with the **VCSi** system because the indoor coil activates longer. As temperature changes slightly, compressor speed also adjusts slightly to compensate.	Conventional system kicks back on at full speed to compensate for small changes in temperature.



Conventional air conditioners take a long time to reach their set-point temperature, and when they finally do, the temperature fluctuates.

However, VCSi closely controls the compressor and senses indoor cooling and heating needs, so the desired temperature is reached faster and remains consistent.

This allows Mr. Slim to run more efficiently and reduces energy costs.

17

ENERGY STAR HIGH EFFICIENCY HAUTE EFFICACITÉ

MR. SLIM – A REAL ENERGY STAR

With a roster of 17 Energy Star certified units, Mitsubishi Electric Canada remains an industry leader in highly efficient, eco-friendly heating and air conditioning technology.

Enjoy year-round comfort and energy savings, all while leaving behind a smaller carbon footprint. It's just another way we're making changes for the better.

Mr. SLIM™ MITSUBISHI ELECTRIC *Changes for the Better*

ADVANCED FEATURES FOR ADVANCED COMFORT

HYPER HEAT AT -25°C

WE START WHERE OTHERS STOP COLD – EXCEPTIONAL HEATING PERFORMANCE AT -25˚C

Low-ambient heating. It's where most heat pumps struggle. For a heat pump to provide heat when the mercury gets ultra-low is no easy task.

Thankfully, Mr. Slim outdoor units offer a superb extended heating range. The MSZ-GE units operate at outdoor temperatures as low as -20˚C (-4˚F). And the MSZ-FE units go even further, providing **excellent heating performance down to -25˚C (-13˚F)**, continually operating on even the coldest of Canadian winter days*. After all, being in Canada for over 30 years has taught us a few things.

*Optional condensation kit may be required for certain Canadian climates.

AIR PURIFICATION INSPIRED BY NATURE

Catechin is a bioflavonoid found in green tea and is known for its deodorizing, anti-bacterial and antiviral properties.

catechin plus air purification system

The Catechin Plus Air Purifying Systems consist of Catechin Pre-Filters and Anti-Allergy Blue Enzyme Filters, which deodorize, deactivate allergens, eliminate bacteria, and promote antiviral effects.

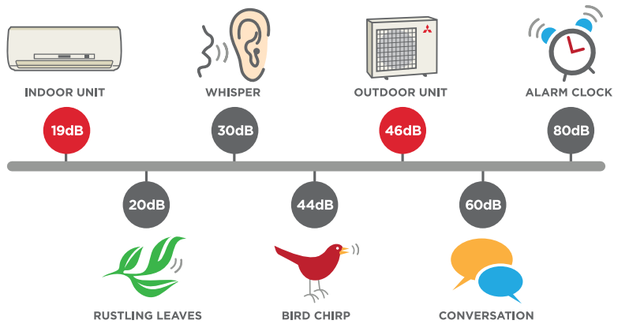
In the Catechin Pre-Filter, we've deeply infused Catechin into every cell, to help keep the air in your home healthy. Better still, it is completely washable and is manufactured to last up to 10 years or longer.

The Anti-Allergy Blue Enzyme Filter traps dust, pollen, mites and other nasty particles that can cause allergic reactions. The artificial enzyme catalyst helps break down S-S bonds in these allergens, transforming them into harmless proteins.

Molecules of the Hybrid Catechin Pre-Filter

WHISPER-QUIET TECHNOLOGY THAT SPEAKS VOLUMES

Advanced technology from Mitsubishi Electric has led to the creation of super-quiet air conditioners suitable for all rooms of your home. At as low as 19 decibels, they're so quiet, you may not even notice they're on. It's the quiet comfort that comes standard with every Mr. Slim.



WIRELESS REMOTE CONTROL

You control your comfort with the touch of a button, without even getting out of your chair. With a large and easy-to-read display, it's easier to use than a TV remote.

(Available with wall-mounted and floor-standing models.)

FUZZY LOGIC "I FEEL"
Imagine a remote that understands you. This one memorizes your ideal settings and recalls them whenever you turn on the air conditioner.

POWERFUL MODE
Temporarily heat or cool your room faster with more airflow than the 'high' fan speed. This operation automatically returns to its regular setting after 15 minutes for optimized energy efficiency.

AUTO MODE
Automatically set the van angles and fan speeds to create the most efficient settings for your room.

24-HOUR ON/OFF TIMER
Save energy costs by setting the unit to turn off when you're not around and start up again just before you get back.

QUIET MODE
Provides whisper-quiet comfort that allows you to enjoy those tranquil moments.

SMART SET
Recall your programmed temperature settings at the touch of a button. You can also set back temperatures to an economical 10°C/50°F to keep your home and pipes from freezing while you're on vacation.

WIDE AIRFLOW
Combined with the 5-Step Vane control, you can adjust the airflow to 42 different patterns, reaching as far as 39 ft from the unit.

ECONO COOL
Gives you up to 20% in energy efficiency by raising the temperature 2 degrees. How? Adjusted airflow means you can't even feel the difference.

CONVENTIONAL COOLING		"ECONO COOL" ON
Ambient Temperature	35˚C/95˚F	35˚C/95˚F
Set Temperature	25˚C/77˚F	27˚C/80.6˚F
Sensing Temperature	30˚C/86˚F	29.5˚C/85.9˚F

WIRED REMOTE

Puts all the controls at your fingertips. With easy-to-follow programming, it features operational and control status at a glance on the built-in digital display.

(Available with ceiling-concealed and 4-way cassette models.)

MULTI-LANGUAGE DISPLAY
Home comfort now comes in eight different languages. (English, French, Italian, Chinese, Spanish, German, Russian, Japanese)

LIMITING THE SET TEMPERATURE RANGE
Set upper and lower temperature limits to prevent excessive heating or cooling.

AUTO OFF TIMER
Pre-set times from 30 minutes to 4 hours – in 30-minute increments.

CONTROLLER LOCK
Disables all buttons or operations on the remote control except for the On/Off button.

WEEKLY TIMER
Up to eight different temperature settings can be programmed for each day.

SELF-DIAGNOSTIC
Displays error codes to notify you when the system malfunctions for easy diagnostics and servicing.

Mr. SLIM™ MITSUBISHI ELECTRIC Changes for the Better

FEATURES AT A GLANCE

Mr. Slim M-Series is available in a wide variety of combinations and features to meet the space demands of any-size room. Mr. Slim units utilize some of the most advanced features and technologies available to date. Use this chart to see which Mr. Slim features and units are right for your needs.

HYPER-HEAT FE-SERIES

MSZ-FE18NA

NEW LEVEL OF COMFORT

Mitsubishi Electric manages the extreme weather easily with our enhanced line-up of energy-efficient FE-series. Our beautifully designed high-heating capacity systems provide exceptional heating performance while being the most remarkable and advanced models we've ever created.

Not only will the FE-series keep your home comfortable, they'll keep your energy bill cool with one of the highest SEER ratings in the industry – up to 26 SEER.

LOW-AMBIENT HEATING

HYPER HEAT AT -25°C

Don't let the thought of facing another Canadian winter make your blood run cold. When the mercury plunges outside, the FE–series rises to the task with some hot news: the guaranteed outdoor operation range for your Mr. Slim system has been extended to -25ºC/-13ºF!* We'll keep things warm where conventional systems fall short.

AMAZING PERFORMANCE EVEN AT THESE LOW TEMPERATURES

MODEL	MSZ-FE09NA	MSZ-FE12NA	MSZ-FE18NA
HEATING CAPACITY @ 5°F	10,900 BTU/H (100%)	12,500 BTU/H (92%)	21,600 BTU/H (100%)

*Optional condensation kit may be required for specific Canadian climates.

i-SEE SENSOR – A NEW WAY OF LOOKING AT TOTAL COMFORT

MSZ-FE09/12NA

Room temperature is only one of the factors that can affect comfort as defined by the industry standard.** Equally important are radiant temperatures, air movement and humidity. This exclusive technology measures radiant hot and cool spots in the room and focuses airflow to those specific areas. This prevents excessive heating or cooling and unnecessary operation, allowing you to enjoy total comfort and less energy waste – something conventional systems were never designed to do.

(Only available in FE09NA and FE12NA models.)

i-see Sensor detects radiant hot and cool spots in the room and focuses airflow to those specific areas.

**American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) Standard 55

ADVANCED FEATURES ALSO INCLUDE:

PLATINUM DEODORIZING FILTER

The filter element contains Platinum Catalyst, which increases deodorizing performance. And with the advanced nano-technology, odour-releasing particles are being absorbed much more efficiently at the molecular level.

HORIZONTAL AND VERTICAL VANE CONTROL

Both sets of directional vanes are now motorized to deliver the air more evenly across the room.

Changes for the Better

SINGLE DUCTLESS SPLIT SYSTEMS

ENERGY STAR HIGH EFFICIENCY HAUTE EFFICACITÉ

Optional accessories available. Visit www.mrslim.ca for more information.

COOLING ONLY VCSi TECHNOLOGY

- Catechin Plus Air Purifying System
- Variable Compressor Speed Inverter Technology
- Ozone-Friendly R-410A Refrigerant
- **Significant Energy Savings (up to 30%)**
- Fuzzy Logic "I Feel" Mode for Comfort Cooling
- **Super-Quiet Technology – Only 19dB(A)**
- Wide Airflow – Up to 150°
- Long Pipe Runs – Up to 100 ft.
- Refrigerant Pre-Charged
- Easy Installation – No Ductwork Needed
- Optional Wired Remote Controller
- 5-Year Parts Warranty
- 7-Year Compressor Warranty

Mr.SLIM™ MITSUBISHI ELECTRIC Changes for the Better

MULTI-SPLIT SYSTEM

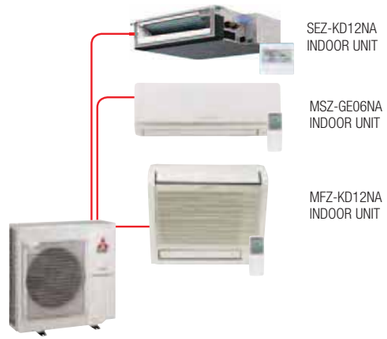
The MXZ-B Series provides you with superior control and flexibility by heating and cooling up to eight rooms, with only a single outdoor unit. As you prefer, the MXZ-B Series can be configured to suit your style and capacity requirements, while offering outstanding energy efficiency.

Combination Examples:

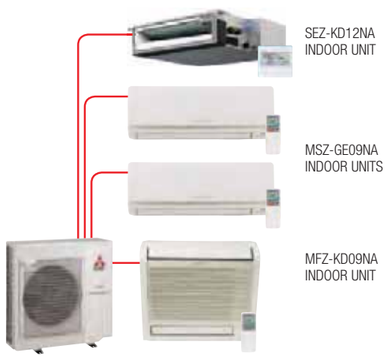
MXZ-2B20NA (2:1)
OUTDOOR UNIT

MXZ-3B24NA (2:1, 3:1)
OUTDOOR UNIT

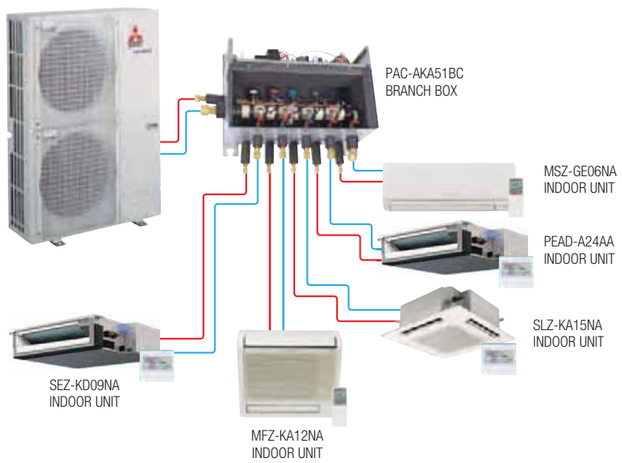
MXZ-3B30NA (2:1, 3:1)
OUTDOOR UNIT



MXZ-4B36NA (2:1, 3:1, 4:1)
OUTDOOR UNIT



MXZ-8B48NA (2:1 - 8:1)
OUTDOOR UNIT



Optional accessories available for all models.
Visit www.mrslim.ca for more information.

FLOOR-MOUNTED FEATURES VCS TECHNOLOGY

- Catechin Plus Air Purifying System
- Dual-Outlet for Optimum Air Distribution
- SmartSet & Econo Cool Functions
- Super-Quiet Technology
- SuperHi Fan Speed
- Optional Wired Remote Controller

*Connectable only with MXZ systems.
*Q=Quiet, L=Low, M=Med, H=Hi, SH=SuperHi
All features may not apply to all models. Ask your Dealer for details.

Mr. SLIM™ MITSUBISHI ELECTRIC Changes for the Better

MULTI-SPLIT SYSTEM

ENERGY STAR HIGH EFFICIENCY HAUTE EFFICACITÉ

HEAT PUMP VCSi TECHNOLOGY

- Catechin Plus Air Purifying System
- Variable Compressor Speed Inverter Technology
- Ozone-Friendly R-410A Refrigerant
- **Significant Energy Savings (up to 30%)**
- **Wide Selection of up to 8:1 combinations**
- Auto Change Over Between Cooling & Heating
- **Super-Quiet Technology – Only 19dB(A) (MSZ-GE09NA)**
- High-Speed Cooling and Heating
- Long Pipe Runs – Up to 230 ft.
- Refrigerant Pre-Charged
- Easy Installation – No Ductwork Needed
- 5-Year Parts Warranty
- 7-Year Compressor Warranty

Mr.SLIM™ MITSUBISHI ELECTRIC Changes for the Better

YOUR LIFE, YOUR STYLE.

Home Comfort, Room by Room

If you take home comfort seriously, then it's time to consider Mr. Slim. With its ease of installation and flexibility, you don't have to restrict your comfort to only one part of your home. And with multiple sleek and stylish indoor units to choose from, you can rest assured that Mr. Slim will fit in almost unnoticed with the decor in any room.

Den: Just knowing how efficiently Mr. Slim operates can help give your home a more relaxed atmosphere.

Bedroom: Steady temperatures throughout the night let you sleep soundly in any weather.

Living Room: Whether you're working or relaxing, you'll notice the difference that a constant temperature makes.

The outdoor unit is so sleek and quiet, your neighbours won't even know you're heating or cooling your home.

MitsubishiElectric.ca

COMFORTING EXPERIENCE

Mitsubishi Electric Canada

Mitsubishi Electric provides a wide variety of commercial and residential heating and air conditioning products. Thanks to our many exclusive technologies like **VCSi**, **VRF** and **H²i**, you can rest assured that our HVAC products are engineered to perform at the highest levels of efficiency and comfort.

For larger residential applications, you can employ the power of a City Multi PUMY system, where you can connect up to 8 indoor units to a single outdoor unit and integrate them with a sophisticated control system. Beyond that, in applications such as high-rise buildings and hotels, you'll find other **City Multi systems** handling the work with ease. Working behind the scenes 24/7 is **Mr. Slim P-Series**, maintaining constant and comfortable temperatures in retail stores, mechanical rooms or server rooms. And **Zuba-Central** fits into your new or existing ductwork to provide a year-round whole-home comfort experience with outstanding energy savings. For more information on these products visit **www.MitsubishiElectric.ca**

The Mitsubishi Electric Difference

Our commitment to innovation and technology is exceeded only by our commitment to service – we stand behind every product that bears the Mitsubishi name. And we demonstrate this by offering you our 5-year parts and 7-year compressor warranty that's among the best in the industry. Through our competent distributor network, strong service support, and unmatched parts availability, it is our assurance to you that you will enjoy the comfort and true quality that only Mitsubishi Electric can offer.

10 YEAR COMPRESSOR WARRANTY*

Our number one commitment is to you. That's why Mitsubishi Electric now offers an improved **6-year parts and 10-year compressor warranty** *to give you years of worry-free home comfort. Ask your dealer for more details or visit www.MrSlim.ca*

Mitsubishi Electric will upgrade the standard warranty to an extended **6-year parts and 10-year compressor warranty** when your Mr. Slim M-Series system is installed by an Authorized HVAC Installer. An additional limited labour warranty may be available in some provinces from the Authorized Dealer. For more information, please contact your local Distributor or MEQ Dealer.

*When installed by an Authorized HVAC (Heating, Ventilating, and Air Conditioning) Installer.

A Green Step in the Right Direction

Look at the commercial buildings around you and chances are that you'll find a Mitsubishi Electric HVAC system quietly and efficiently working behind the scenes. And because Mitsubishi Electric is always striving to make advancements in heating and air conditioning technologies, it's no surprise to find us at the forefront of geothermal applications like the one featured here.

Quebec City

LEED-NC GOLD CERTIFICATION

This building uses up to 55% less energy than a building of similar size. That's enough to power 110 single-family homes each year.

With a capacity of nearly 4 million BTU/h of City Multi WR2 systems that simultaneously heat and cool over 148,000 sq. ft. of floor space using geothermal energy, Place de L'Escarpement is one of the 10 most efficient of its class in Canada.

SYSTEM INSTALLED

Geothermal Units: City Multi WR2 systems x 37
Indoor Units: Ceiling-Concealed units x 269
Fresh Air Equipment: Lossnay/RenewAire HE2XINH x 7

Controller: Centralized controller G-50A x 7
E-mail Notification License x 7
BACnet Interface x 7
Simple Remote Controller x 269
